GMaven 1.0-rc-5 Release

New and Noteworthy

- Default runtime for JVM >= 1.5 is now Groovy 1.6, else Groovy 1.5
- Upgrade 1.5 runtime to Groovy 1.5.7
- Stub generation for scripts
- AST transformations should work correctly

Using

Command-line Access

If this release is the *latest*, then simply use the `groovy` prefix to invoke goals, as in:

```
mvn groovy:<goal>
```

Otherwise, use the full plugin identifier to invoke this version:

```
mvn
org.codehaus.groovy.maven:gmaven-plugin:1.0-
rc-5:<goal>
```

Project Configuration

When configuring projects to use this plugin be sure to define elements in your projects top-level POM's `pluginManagement` section to bind your project to the required version:

```
<project>
    <dependencyManagement>
        <dependencies>
            <dependency>
```

```
<groupId>org.codehaus.groovy.maven</groupId>

<artifactId>gmaven-mojo</artifactId>
                <version>1.0-rc-5</version>
            </dependency>
            <dependency>

<groupId>org.codehaus.groovy.maven.runtime</
groupId>

<artifactId>gmaven-runtime-1.6</artifactId>
                <version>1.0-rc-5</version>
            </dependency>
        </dependencies>
    </dependencyManagement>
    <build>
        <pluginManagement>
            <plugins>
                <plugin>

<groupId>org.codehaus.groovy.maven</groupId>

<artifactId>gmaven-plugin</artifactId>

<version>1.0-rc-5</version>
                </plugin>
            </plugins>
        </pluginManagement>
```

```
    </build>
</project>
```

Best Practice

It is **highly** recommended that you **always** bind, via `pluginManagement` the version of plugins which your build depends upon. or with `dependencyManagement` for versions of artifacts.

Source Code

The source-code for this release is available for browsing here.

Users who wish to check-out this version can access the release tag with Subversion:

```
svn co
https://svn.codehaus.org/groovy/gmaven/tags/
gmaven-1.0-rc-5
```

Change Log

JIRA Issues (14 issues)					
Type	**Key**	**Summary**	**Priority**	**Status**	**Resolution**
	MGROOVY-197	AST transformations don't work		Closed	Duplicate
	MGROOVY-195	Upgrade 1.5 runtime to Groovy 1.5.7		Closed	Fixed
	MGROOVY-194	Stubs do not implement GroovyObject		Closed	Fixed
	MGROOVY-192	unable to select 1.6 provider		Closed	Not A Bug
	MGROOVY-191	Change default runtime to 1.6		Closed	Fixed
	MGROOVY-190	Upgrade to Groovy 1.6.0		Closed	Fixed
	MGROOVY-187	Stubs are being compiled into artifacts.		Closed	Fixed

	MGROOVY-186	Constructor stub generation does not properly throw or catch exception from abstract parent class		Closed	Fixed
	MGROOVY-185	Upgrade to Groovy 1.6-rc-2		Closed	Fixed
	MGROOVY-184	org.codehaus.groovy.maven.plugin.CompileState implementation causes errors in <module/> builds		Closed	Fixed
	MGROOVY-174	Transforms don't work under GMaven		Closed	Fixed
	MGROOVY-171	Stub Generation for Scripts does not work		Closed	Fixed
	MGROOVY-163	description how to build groovy project is incomplete		Closed	Cannot Reproduce
	MGROOVY-119	Update dependencies used by SHITTY tests		Closed	Fixed
