## **EPSG extensions**

Module Maintainer:	Martin Desruisseaux
Status:	***
Email Help:	Geotools-gt2-users@lists.sourceforge.net
Volunteer:	geotools-devel@lists.sourceforge.net
IP Review:	review.txt

Additional CRS beyong the one defined in the official EPSG database. The additional CRS are defined as *Well Known Text* (WKT) in a property file. At the difference of the legacy <code>epsg-wkt</code> module, only CRS not found in the SQL-backed EPSG database are defined in the property file.

This module contains 2 property files:

- <u>esri.properties</u> contains additional CRS defined by ESRI in the EPSG namespace.
- <u>unnamed.properties</u> contains additional CRS from other sources in the EPSG namespace.

## **Module Status**

Module completed. Stable if no major issues are reported.

## How to use

Just drop the JAR in the classpath. New EPSG codes made available by this plugin are listed in the two properties files mentioned above.

## **Future development**

None planed at this time.
