Documentation for Cargo 1.0.2 can be found here.

A few days after the CARGO 1.0.1 release, two important bugs have been submitted to us in the CARGO Maven2 plugin:

- CARGO-776 makes the CARGO Maven2 plugin unable to take into account datasource configurations.
- CARGO-777 makes the CARGO Maven2 plugin unusable in some cases using the `mvn cargo:*` goals.

These two bugs affect only in the CARGO Maven2 plugin, the rest of CARGO is not affected; moreover both of these bugs have been corrected and the CARGO Maven2 plugin version **1.0.1-sr-1** (1.0.1 Service Release 1) released.
