Home

Welcome to TimTam, The Crunchy, Chocolate Coated, Java GUI Editor for Confluence.

TimTam is based on the Eclipse platform, and will be available in both standalone (RCP) and plugin flavours.

It uses Confluence's SOAP API (see the spec and the latest WSDL) to provide a rich editing and site management environment.

Beta 3 Available

Hmmmmmm
A year and a month later, and due to actualy having a user ask for it, beta3 with word wrap (has been in cvs for a year or so) and some bug fixin is on the Downloads page.

Oh and it's tested with eclipse 3.1.1
