

5. Viewing Sessions

Features

The Sessions page allows users to:

- view the sessions of a given Service Space;
- view the peer hosting the session; and
- view the contextualiser owning the session.

The following image is a screenshot of the Sessions page:

WADI

Sessions - CLUSTER

This page displays the sessions of a selected ServiceSpace.

Service Space Names:

Use this slider to auto-refresh

Session Name [Show Filter]	Contextualiser Name [Show Filter]	Contextualiser Index [Show Filter]	Hosting Peer [Show Filter]
