

CSV Export Plugin

Deprecated

This plugin is deprecated since SonarQube 3.0. Please use the [web service API](#) or/and the [Excel samples](#) to extract data instead.

<p>Your browser does not support iframes.</p>

Description / Features

The CSV Export plugin allows to export the measures and the number of violations per file to a CSV file.

Metrics

- Info violations
- Major violations
- Minor violations
- Rules compliance
- Violations**
- Weighted Violations

SCM

- Commits
- Last commit

Size

Include number of violations per rule

Download CSV

Select the measures to export

Select this checkbox to also export the number of violations per rule and per file

Click to download the CSV file

Installation

1. Install the plugin through the [Update Center](#) or download it into the `SONARQUBE_HOME/extensions/plugins` directory
2. Restart the SonarQube server

Usage

Access the *CSV Export* page from the left sidebar

Known Limitations

- Since SonarQube 3.1, test files can have violations. The plugin currently does not export violations reported on test files, but this feature is planned for next release (1.4 - see [SONARPLUGINS-2100](#))
- The report can contain empty cells: this is not a bug (see [SONARPLUGINS-2102](#)) and it does not affect the results shown in the table (most of the time, an empty cell means "0").

Changelog

Release 1.3 (3 issues)

Type	Key	Summary	Priority	Status
	SONARPLUGINS-2101	Manual violations are not exported		Closed
	SONARPLUGINS-2093	Make sure that the CSV export plugin is compatible with the Developer Cockpit plugin		Closed

Release 1.2 (2 issues)

Type	Key	Summary	Priority	Status
	SONARPLUGINS-1664	"Summary" number of violations per rule" shows all 7908 "user" must be required		Closed
	SONARPLUGINS-1563	Exclude metrics prefixed by "new_"		Closed
