

Unsign Jar Files (Recursively)

```
ant = new AntBuilder();
tmpDir = "tmpDir"

new File(args[0]).eachFileRecurse({file->
    if(file.name.endsWith(".jar")) {
        antSEQUENTIAL {
            mkdir(dir:tmpDir)
            echo "Unsigning file: $file"
            unjar(src:file, dest:tmpDir)
            delete {
                fileset(dir:tmpDir, includes:"META-INF/*.DSA,META-INF/*.SF,META-INF/*.RSA")
            }
            jar(destFile:file,baseDir:tmpDir)
            delete(dir:tmpDir)
        }
    }
})
```
