

Maven repository tools

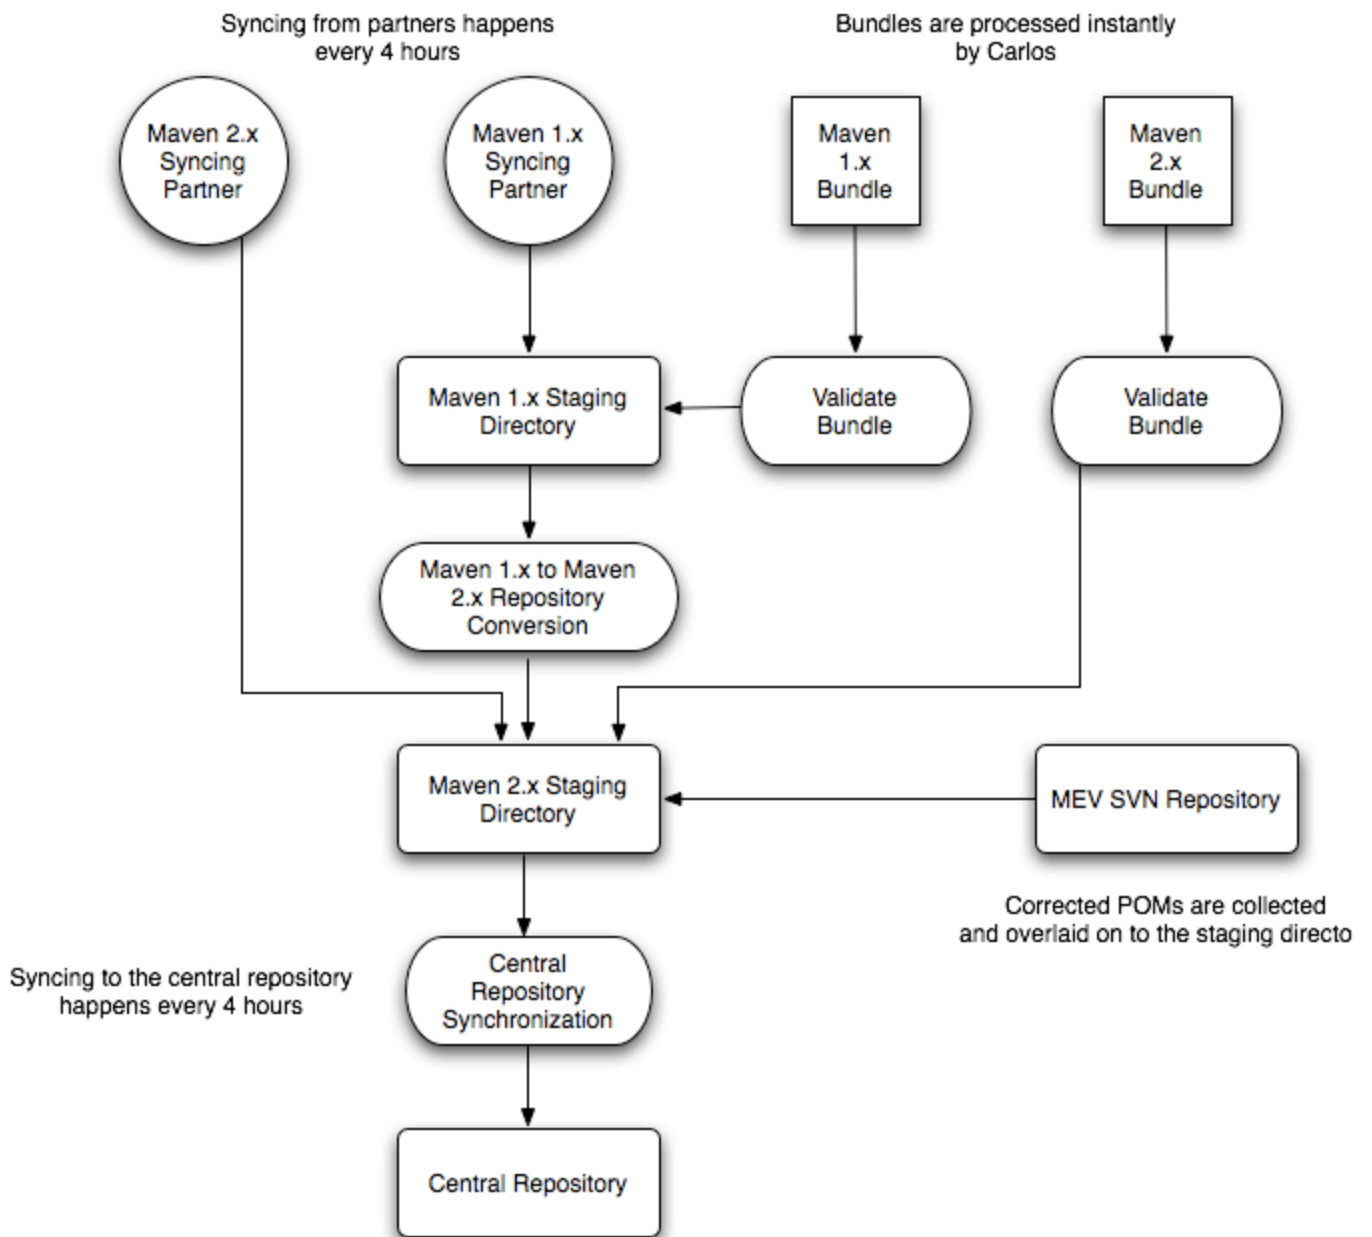

- don't overwrite m2 poms -> report when m1 pom changes
- check for updated m1 poms (now only checks for jars)
- put m2 poms in SVN ✓
- m2 poms in repo come from SVN ✓
- when m1 pom changes get it with rsync to a local machine and make a SVN diff

<http://jira.codehaus.org/browse/MRM>

Proposed:

Current:

TODO: Parts of the current diagram should be merged into the proposed one for more detail (ie, the bundle uploads)
