

Hello World Recipes

How many ways can you say Hello World?

This example shows console, WinForms and Gtk versions of "Hello, world!".

Console

```
print "Hello, world!"
```

WinForms

```
import System.Windows.Forms

f = Form(Text: "Hello, boo!")
f.Controls.Add(Button(Text: "Click Me!", Dock: DockStyle.Fill))

Application.Run(f)
```

Gtk#

```
import Gtk from "gtk-sharp"

Application.Init()

window = Window("Hello, boo!",
                DefaultWidth: 200,
                DefaultHeight: 150)

# The application should exit after the window is closed
window.DeleteEvent += def():
    Application.Quit ()

window.Add(Button("Click Me!"))
window.ShowAll()
Application.Run()
```
