

Continuous Integration

Having automated continuous integration builds is definitely a good thing. So, quite naturally, Gant has some.

Here is a Bamboo build at Codehaus:

URL	http://bamboo.ci.codehaus.org/browse/GANT-TRUNK
Build server	Atlassian Bamboo
Operating system	Unknown (JDK1.6)
Repository modification check	After each commit, but waiting about 10 minutes to capture all of a rapid sequence.

Here is the TravisCI build

URL	https://travis-ci.org/Gant/Gant/
Build server	TravisCI
Operating system	JDK 1.7
Repository modification check	After each commit, but waiting about 10 minutes to capture all of a rapid sequence.
