

Riverlayout Plugin

Description

Provides integration with [RiverLayout](#).

Installation

The current version of **griffon-riverlayout-plugin** is **0.2**
To install just issue the following command

```
griffon install-plugin riverlayout
```

Usage

The following nodes will become available on a View script upon installing this plugin

Node	Property	Type	Default	Required	Bindable	Notes
riverLayout [RiverLayout]						Use it as with any other layout node

RiverLayout has the following keywords

- **br, p** => page breaks
- **left, right, center** => horizontal alignment
- **vtop, vcenter** => vertical alignment
- **hfill, vfill** => filling
- **tab** => space between components

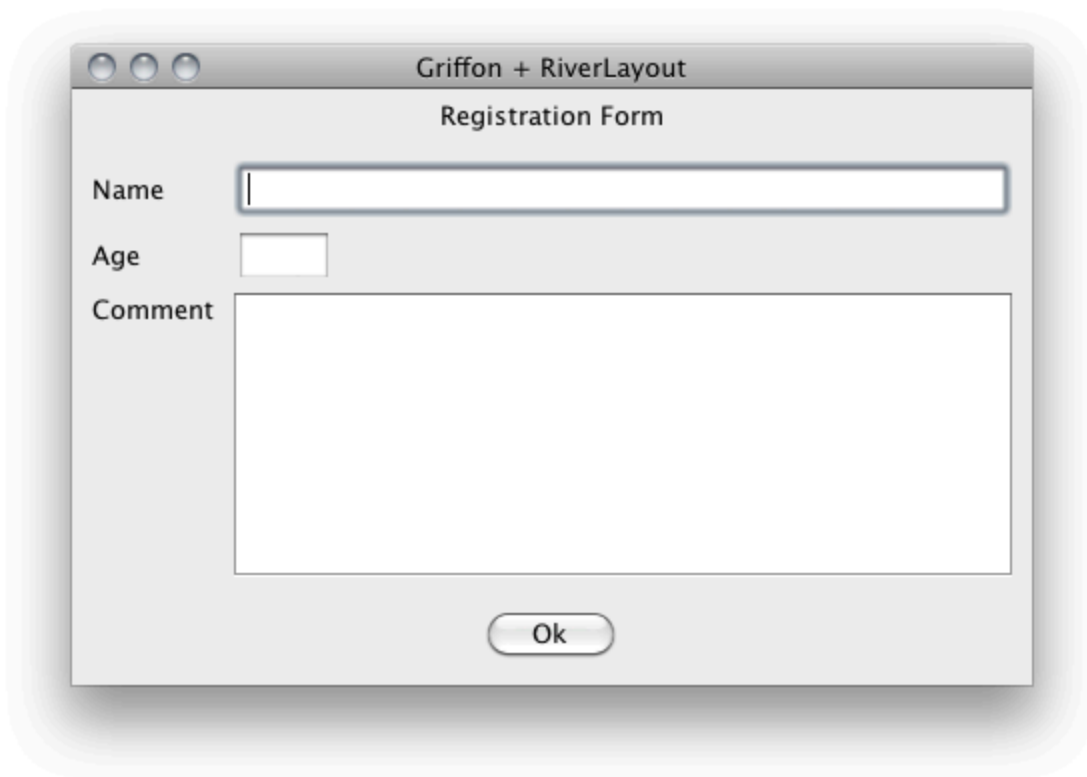

Example

The following example is taken from Riverlayout's page

```

application(title: 'Griffon + RiverLayout',
  size: [480, 320],
  locationByPlatform:true,
  iconImage: imageIcon('/griffon-icon-48x48.png').image,
  iconImages: [imageIcon('/griffon-icon-48x48.png').image,
    imageIcon('/griffon-icon-32x32.png').image,
    imageIcon('/griffon-icon-16x16.png').image]) {
  riverLayout()
  label 'Registration Form', constraints: 'center'
  label 'Name', constraints: 'p left'
  textField constraints: 'tab hfill'
  label 'Age', constraints: 'br'
  textField columns: 3, constraints: 'tab'
  label 'Comment', constraints: 'br vtop'
  scrollPane(constraints: 'tab hfill vfill') {
    textArea()
  }
  button 'Ok', constraints: 'p center'
}

```
