

Welcome Dragan!

Tynamo's ranks are growing yet again! Please join me welcoming Dragan Sahpaski to the project. Dragan is a highly skilled individual whom I had a privilege to work with last summer when I was mentoring him for a GSoC project. I've had this idea for a light in-place content editing component for Tapestry5 and when I was looking for a reasonable rich text editor to integrate with, of course I found [tapestry5-ckeditor](#), a brilliant [CKEditor](#) integration for T5 that Dragan had put together. At the same time, he was looking for a solid home to publish the component. Fits like a Huggies diaper, right? This marks the first foray into UI components for [Tynamo.org](#) though, but hey what's life without risks? 😊
