

jetty-plus.xml

jetty-plus.xml

The jetty-plus.xml file is part of the jetty6 distribution and is found in the `etc` folder. It sets up support for the J2EE features that are implemented as extensions to the core jetty6 server. This file must be present on the command runline if you wish to use any of these features for your webapp.

This file is discussed in the sections on [JAAS](#) and [JNDI](#).
