

# IzPack at the Devovx conference - showcase YOUR installer!

I am delighted to let you know that I will present IzPack at the Devovx conference in the "*Tools in Action*" sessions! (see <http://devovx.com/display/Devovx2K10/IzPack++because+you+and+your+end+users+have+installation+issues>)

**I will make a demo during my talk, and I would like to use an installer showcase from one of yours :-)**

A **community-contributed example** would be indeed much more interesting both for the audience and for me as a speaker. It's not that I don't have a few examples for a demo, but I'm sure you guys have something better to offer!

This is why I am launching a call for contributions: I would demo **YOUR installer** (and as a side-effect, **YOUR software would be publicized in front of a large audience**).

You can contact me by email at [julien.ponge@gmail.com](mailto:julien.ponge@gmail.com) with your proposal. Note that:

- I will not sign any non-disclosure agreement of some sort
- I need to be able to show the IzPack configuration and build files so that the demo is compelling
- the session will be recorded, so even people not attending the conference will see it!
- I will not accept any money for your installer to be showcased.

Thanks for sending your submissions!
