

Refactoring Suggestions

This page is about collecting refactoring ideas.

Class (incl. Package)	Method Signature	Line	Suggestion
org.castor.jdo.util.JDOConfFactory	createJdoConf(InputStream, EntityResolver, ClassLoader)	90	ClassLoader is never used. Remove it from signature.
org.exolab.castor.jdo.JDOManager	loadConfiguration(...) createInstance(String)		Create a Factory (e.g. JDOManagerFactory) to set ClassLoader & various parameters instead of using static loadConfiguration and createInstance methods.
