

Introducing tapestry-activiti!

The Tynamo team never rests and is at it again, bringing you a new Tapestry module: `tapestry-activiti`. This module allows you to integrate Activiti into your Tapestry application. Activiti is a workflow and Business Process Management (BPM) platform. Its core is a super-fast and rock-solid BPMN 2 process engine for Java. We are very excited about this new module and can't wait to hear your thoughts, suggestions and how you put it to use. Go check out [tapestry-activiti!](#)

Cheers,
Tynamo Team

PS: We'd like to thank Omar Carvajal for all the work he has put into this.
