

# Gmock 0.6.0 released

We are pleased to announce the release of Gmock 0.6.0. Gmock is a mocking framework for the Groovy language. Gmock is all about simple syntax and readability of your tests so you can spend less time learning the framework and more writing code.

This release add:

- the support for static property mocking
- introduction of a with(mock) syntax
- setting up expectation using the mock closure
- adding a static closure as a syntax shortcut

Please visit <http://gmock.org> or <http://code.google.com/p/gmock/> for more information.

We are looking for your feedback and how you feel we could improve Gmock in the route to the 1.0.0.
