

Using ant-contrib tasks with maven-antrun-plugin

```
<plugin>
<artifactId>maven-antrun-plugin</artifactId>
<executions>
<execution>
<phase>install</phase>
<configuration>
<!--tasks unless="maven.test.skip">
<echo message="To skip me, just call mvn -Dmaven.test.skip=true"/>
</tasks-->
<tasks>
<taskdef
resource="net/sf/antcontrib/antcontrib.properties"
classpathref="maven.plugin.classpath"/>
<delete file="${
Unknown macro: {wsm.jboss.server}
}/deploy/${
Unknown macro: {build.finalName}
}.war"/>
<delete dir="${
Unknown macro: {build.finalName}
}.war"/>
<if>
<isset property="unpacked"/>
<then>
<mkdir dir="${
Unknown macro: {wsm.jboss.server}
}/deploy/${
Unknown macro: {build.finalName}
}.war"/>
<copy todir="${
Unknown macro: {wsm.jboss.server}
}/deploy/${
Unknown macro: {build.finalName}
}.war">
<fileset dir="${
Unknown macro: {project.build.directory}
}/$
"/>
</copy>
</then>
<else>
<copy todir="${
Unknown macro: {project.build.directory}
}/deploy">
<fileset dir="${
Unknown macro: {project.build.directory}
}
includes="${
Unknown macro: {build.finalName}
}.war"/>
</copy>
</else>
</if>
</tasks>
</configuration>
<goals>
<goal>run</goal>
```

```
</goals>
</execution>
</executions>
<dependencies>
<dependency>
<groupId>ant-contrib</groupId>
<artifactId>ant-contrib</artifactId>
