

LicencePanel

Usage

A panel to show the licence of the installed application as raw text.

This panel prompts the user to acknowledge a license agreement.

The installation is blocked and the Next button is disabled until the user selects the 'agree' option.

To specify the license agreement text you use the `LicencePanel.licence` resource.

Resources

| Resource | Description |
|-----------------------------------|---|
| <code>LicencePanel.licence</code> | The name of the file that contains the license agreement text to show on the panel. |
