

CARGO 1.1.2 now available!

Hi CARGO enthusiasts

CARGO 1.1.2 is now ready, it comes with a number of new features and bug fixes.

On the new features and improvements side:

- CARGO now supports JBoss 7! (CARGO-1014)
- We have added new Maven2/Maven3 archetypes:
 - Datasource example (CARGO-998, CARGO-999)
 - Remote deployment (CARGO-1000, CARGO-1001)
- Many CARGO components are now much easier to use:
 - Configuration properties can now be set using Java system properties (-Dxxx=yyy) (CARGO-1007, CARGO-1009)
 - The CARGO JBoss remote deployers are not needed to be in the classpath anymore, they're part of the JBoss container and are loaded dynamically (CARGO-1015)
- The `cargo:run` mojo is now much easier to use, and in many cases requires no plugin configuration at all:
 - Configuration properties can now be set using Java system properties (-Dxxx=yyy) (CARGO-1007, CARGO-1009)
 - New attributes: `containerId` and `containerUrl` (CARGO-970)

You can read our reworked Maven2/Maven3 plugin getting started guide, <http://cargo.codehaus.org/Maven2+Plugin+Getting+Started> and realize how easy it now is to use CARGO on any existing Maven2/Maven3 Java EE project; no configuration is required at all!

Of course, there are also some bug fixes:

- The Cargo Maven2/Maven3 deployer no more ignores deployables in the `<configuration>` element of the container (CARGO-1002)
- Adding a configuration file to a non-existing target directory does not result in `FileNotFoundException` anymore (CARGO-1004)
- The Maven2/Maven3 mojos now enable the logger in debug mode (CARGO-1010)
- The remote deployers now get their logger from the configuration (CARGO-1012)
- Some UberWar fixes:
 - Dollar sign in value no more breaks NodeMerge strategy (CARGO-1016)
 - Comma can now serve as a pattern end mark (CARGO-1017)
 - Left side expression no more appears twice in the merged result (CARGO-1018)
- `cargo:deploy` on JBoss now works even when internet is unavailable (CARGO-1019)
- The JOnAS installed local deployer does not show an incorrect warning anymore (CARGO-1021)

Enjoy!
