

Castor release instructions

This page discusses the relevant information required to perform a (snapshot) release of Castor using Maven and enlists the required prerequisites.

Required readings

- [Howto configure maven release settings](#)
- [Howto release a snapshot](#)
- [Howto perform a final release](#)
- [Howto release docs](#)

Recommended readings:

1. [A Maven repository guide for Codehaus and Nexus](#)
2. [Performing a release on Codehaus](#)
3. [Client system prerequisites for performing a release on Codehaus](#)
4. [How to generate PGP signatures with Maven](#)
