

# CSS Plugin

<p>Your browser does not support iframes.</p>

## Description / Features

The plugin enables analysis of CSS within SonarQube.

## Installation

1. Install the plugin through the [Update Center](#) or download it into the `SONARQUBE_HOME/extensions/plugins` directory
2. Restart the SonarQube server

## Usage

### Run an Analysis with the SonarQube Runner (recommended method)

To run an analysis of your project with CSS files, use the [SonarQube Runner](#).

A sample project is available on GitHub that can be [browsed](#) or [downloaded](#): `/projects/languages/css`.

### Run an Analysis with the other Analyzers

[Maven](#) and [Ant](#) can also be used to launch analysis on Css projects.

## Metrics

See [Metrics documentation page](#).
