

# 0.11 arrives at beta-1

Hi GParas enthusiasts,

on our path towards the next GParas release we've reached an important milestone - the beta-1 has just been made available. To get a feel of what's coming, experiment with the new dataflow constructs, try agent validators, test GParas from pure Java applications using the new Java API or just get your hair blown back by our lightning fast actors, grab it now at <http://bamboo.ci.codehaus.org/browse/GPARS-REL/latest/artifact> or use the usual integration options described at <http://gpars.codehaus.org/Integration>

As is our good tradition, an updated User Guide is ready at <http://gpars.org/SNAPSHOT/guide/index.html>

You might also like to check out what's new - <http://gpars.org/SNAPSHOT/guide/guide/2.%20Getting%20Started.html#2.6%20What%27s%20new>

Have groovy times and let us know your opinion.

The GParas team
