

XML-XSD To Supported

Motivation:	Supporting the new xml parser
Contact:	Justin Deoliveira
Tracker:	http://jira.codehaus.org/browse/GEOT-XXXX
Tagline:	

This page represents the **current** plan; for discussion please check the tracker link above.

Description

Moving the new xml parser from unsupported to supported. All the xml modules meet the following criteria for supported modules:

	Visibility	Used extensively as part of wfs 1.1 support for GeoServer
	IP Check	
	Test Coverage	
	User Documentation	GEOTDOC:05 XML Parsing and Encoding

The proposal involves finding a home in supported space for the following unsupported modules. The proposed moves are:

- unsupported/xml-xsd ==> library/xml **
- unsupported/xml-gml2 ==> extension/xml/gml2
- unsupported/xml-gml3 ==> extension/xml/gml3
- unsupported/xml-sld ==> extension/xml/sld
- unsupported/xml-filter ==> extension/xml/filter

** Involves lumping in xml-xsd with the current xml module

Status

This proposal is under construction.

Voting has not started yet:

- [Andrea Aime](#)
- [Ian Turton](#)
- [Justin Deoliveira](#)
- [Jody Garnett](#)
- [Martin Desruisseaux](#)
- [Simone Cimatti](#)
