

# Source

## Source Repository

### Anonymous Subversion over WebDAV

Anonymous non-committer access is allowed over normal non-SSL WebDAV.

<http://svn.codehaus.org/atomserver/>

### Committer Access - WebDAV

Committer access over HTTPS + WebDAV is suitable for all users (including behind firewalls).

<https://svn.codehaus.org/atomserver/>

### Browsable source

The source repository can be browsed online.

<http://svn.atomserver.codehaus.org/>

### RSS feed of changes

An RSS 2.0 feed of the changelog is available for subscribing.
