

# mapbuilder-lib-1.5.1-release

mapbuilder-lib-1.5.1-release

=====

2014-03-26

This is a minor release, addressing some bug fixes with recent browsers (Firefox 3.6 and 4+, Internet Explorer 9 to 11, Opera and WebKit-Browsers like Google Chrome), and updating OpenLayers to the 2.13 release.

This release was created as a maintainece for the last official release of Community Mapbuilder.  
See [EndOfLife](#) for more information.

It covers the following:

- \* Support of Opera ([MAP-484](#)): mapbuilder examples work in Opera 10.51 and 9.50.
- \* Limit OverviewMap zoomin to a defined zoomLevel ([MAP-560](#))
- \* catch any error that occur accessing a stylesheet ([MAP-555](#))
- \* enable id-based widget texts
- \* enable new line in a message (\n will be interpreted as a new line)
- \* Support of WebKit-Browser ([MAP-561](#)): mapbuilder examples work with Apple Safari 5.0.4, SRWare Iron 3.0.197.0 (22047), Mozilla Firefox 4.0 and 3.6.9, Internet Explorer 8 and Opera 9.5 and 11.01.
- \* enable input in CursorTrack widget: pan and zoom to a user defined coordinate
- \* EPSG 31251-31259 (Austrian projections) added
- \* updated Proj4js to proj4js-1.1.0 r2206 (i.e. tags/proj4js-1.1.0)
- \* Update to OpenLayers 2.13 ([MAP-562](#))
- \* Support for Google Maps API v3 ([MAP-565](#))
- \* Support for IE 9 ([MAP-564](#))
- \* Speedup for more than one widgets using the same stylesheet - caching it
- \* Support for IE 10 ([MAP-566](#)): also compatibility mode
- \* use OpenLayers Click and Hover Handler (instead of priority events), thus the context changes from Feature to Control
- \* Support for IE 11 ([MAP-567](#))

See the [Release Notes](#) for Details
