

# Repository Tools

## Repository Tools Plugin

### Subversion

- <http://svn.codehaus.org/mojo/trunk/sandbox/repositorytools-maven-plugin/>

### Usage Example

- <http://www.nabble.com/Re%3A-Tools-for-automated-deployment-of-repository-artifacts--p8957801s177.html>

```
mvn repositorytools:copy-repository \  
  -Dsource=id::default::http://people.apache.org/path/to//maven-staging/repo \  
  \  
  -Dtarget=id::default::scp://people.apache.org/path/to/destination/repo \  
  -Ddeploy=true
```

Don't use it on a production repository without testing it out first !
