

JRuby 0.9.2 released!

The JRuby team is pleased to announce the release of JRuby 0.9.2.

Download: <http://dist.codehaus.org/jruby/>

This release has some great improvements:

- Extensions openssl and readline now working
- Code for a new graphical irb console
- Partial support for iconv and bigdecimal extensions
- RSpec now supported
- Improved Rails support
- Fixed all known block and scoping bugs
- Enhanced parser performance
- More compiler and performance work
- Refactored variable scoping logic
- 127 Jira issues resolved since 0.9.1

Ola Bina gets accolades for completely writing an openssl clone in Java from scratch! We are not worthy 😊

Damian Steer has written a beautiful irb console in Java Swing which has color highlighting and popup code completion.

Thanks to several new and returning contributors: Anders Bengtsson, Aslak Hellesoy, Peter K Chan, Thomas Palmer, and Wes Nakamura.

Additional thanks to all the people on our mailing lists who help give feedback and ideas.
