

# TridentBuilder Plugin

## Description

Brings the [TridentBuilder](#) libraries (based on [Trident 6.2](#)) into your Griffon application. Trident is an animation library that is toolkit agnostic ([wiki](#))

## Installation

The current version of **griffon-trident-builder-plugin** is **0.7**  
To install just issue the following command

```
griffon install-plugin trident-builder
```

### Warning

This plugin requires JDK6 to be installed, it will also constrain the running environment to JRE6 or above.

## Usage

Trident nodes are added by default to the root builder without a prefix, which means you can call them directly. Refer to the [builder's](#) page to know what nodes are available.

## History

Version	Date	Notes
0.7	05-17-11	Release sync with Griffon 0.9.3
0.6.1	02-22-11	Upgraded dependencies
0.6	12-21-10	Release sync with Griffon 0.9.2
